

REKA Holiday Village, Disentis/Mustér

New structure

■ fanzun.swiss/en/referenz/reka-feriendorf-disentismuster-en/

Starting situation and idea

Fanzun was awarded the general planning contract based on a competition for a study.

Challenges

The client had very definite ideas of how the buildings should look based on other holiday villages which the client had commissioned. The energy footprint of the entire holiday village including six residential buildings, a community centre and a swimming pool was to be optimised.

Approach

The structure is built around an RCC skeleton with prefabricated roof and façade elements. Energy for heating and hot water supply is derived from pellets. When it was inaugurated, REKA Disentis was the largest Swiss holiday community built to comply with Minergie standards.

Developer: Schweizer Reisekasse Genossenschaft, Bern

Completion: 2005

Project type: New structure

Project author: Fanzun AG

Construction costs: CHF 27 Mio

Scope of services: Development, General Planning, Architecture, Civil Engineering, Structural Engineering, Cost Planning, Construction Management

Fanzun AG Architekten · Ingenieure · Berater
Ganzheitlich entwickeln, gestalten und realisieren.

Wir erwecken Ideen zum Leben.
